Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India’s exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. INTERNAL RISK FACTORS

1. We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.

A summary of outstanding matters set out below includes details of civil and criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving us, our Subsidiary, Directors, Promoter and Group Company, as at the date of this Draft Red Herring Prospectus.

Cases against our Group Company.

Nature of Cases	No of Outstanding Cases	Amount involved (₹ in Lakhs)

As per above table our company, Directors, Promoters and Group Company do have any litigation but the same can occur in the future.

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoter, our Directors, see “*Outstanding Litigations and Material Developments*” beginning on page 187 of this Draft Red Herring Prospectus.

2. At present, our organization does not engage in contract farming arrangements. The absence of such agreements may expose us to risks associated with production, market volatility, and adverse weather conditions, potentially impacting our productivity and efficiency.

Without contract farming agreements, our company faces uncertainties regarding the demand for specific agricultural products. In the absence of such agreements, our company is more exposed to fluctuations in market prices for agricultural commodities. This absence of formal agreements with farmers or agricultural producers exposes us to significant risks related to production, market volatility, and adverse weather conditions, all of which can have severe consequences on our company's revenue. Without contract farming, we lack guaranteed access to a consistent supply of raw materials, such as wheat, essential for our production processes. This reliance on the open market can lead to supply shortages during peak demand periods or poor harvests, disrupting our production schedules and reducing output. Market volatility can stem from various factors such as changes in consumer demand, global supply levels, trade policies, and currency fluctuations. These fluctuations can impact our revenue and profitability, especially if market prices fall below production costs. Unlike contractual arrangements that guarantee a market for our produce, operating without such agreements means we must rely on current market conditions and our competitive positioning to attract buyers. This uncertainty can lead to challenges in planning production levels and anticipating sales volumes.

3. As on the date of this Draft Red Herring Prospectus, we are in process of obtaining the requisite approvals, clearances, or permissions from the pertinent authorities for our proposed civil construction for expansion. Failure to procure such approvals and permits may have detrimental implications for our business operations, financial performance, cash flows, and overall financial standing.

We have not yet initiated applications for the requisite licenses and approvals necessary for the establishment of our new civil construction project related to our expansion plans as laid out in the section titled “Objects of the Issue” beginning on page 79 of this Draft Red Herring Prospectus. Specifically, this includes the installation of plant and machinery for the production of products such as pasta, macaroni, poha etc., in our existing manufacturing unit. Our company is in process to seek approval of layout plans for expansion and various other licenses required to carry out civil construction on existing unit for expansion and installation of new plant and machinery. These approvals will be pursued prior to the importation of plant and machinery. For further details, please refer to the section titled “Government and Other Approvals” beginning on page 192 of this Draft Red Herring Prospectus.

We commit to applying for these approvals before commencing commercial production at the aforementioned manufacturing units. However, we cannot guarantee timely receipt of these approvals. A failure to obtain the required approvals or delays in doing so could impede progress on other operational activities necessary for completing the manufacturing units. Such delays may result in actual construction costs exceeding budgeted amounts due to factors including, but not limited to, construction delays, raw material cost escalations, fluctuating interest rates, labour expenses, foreign exchange rate fluctuations, regulatory and environmental considerations, weather conditions, and our financing requirements.

4. Our Company is subject to high working capital requirements and our inability to fund these requirements in a timely manner may adversely impact our financial performance.

Our Company is engaged in Processing and Trading of Wheat and allied products. For the period ended June 30, 2024 the Company’s net working capital requirement is ₹1,445.39 Lakh as against in FY 2023-24 the Company’s net working capital requirement is ₹1,443.11 Lakhs. Our net working capital requirement for the full FY 2024-25 is estimated at ₹1,665.47 Lakhs as on the date of this Draft Red Herring Prospectus of which ₹400 lakh will be allocated for the financial year 2024-25 from the IPO proceeds. we meet our working capital requirements in the ordinary course of its business from capital, internal accruals, unsecured loans, working capital loans from the Banks etc. The detail calculation of working capital requirement of the Company is given below-

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations.

For further details regarding working capital requirement, please refer to the chapter titled “*Objects of the Issue*” beginning on page no. 79 of this Draft Red Herring Prospectus.

5. Our business operations are currently limited to a few states. Furthermore, our Company is in the process of acquiring machinery for the production of various wheat-based products. Consequently, we may face challenges in selling and distributing these new products beyond our existing states.

Currently, we are carrying our business mainly in the state of Madhya Pradesh and Maharashtra and hence our major revenues are generated from operations in these regions only. We generate around 100% of the revenue of the Total Domestic Sales generated as on June 30, 2024 from the state of Madhya Pradesh. Our reliance on these states for domestic sales means that any inability to sell our products in these regions could significantly impact our revenue.

Additionally, we intend to use a portion of the Net Proceeds from this Issue to acquire machinery to produce various wheat-based products such as Macaroni and Pasta at our manufacturing facility. Due to our limited experience in producing these products, we may encounter challenges in selling and distributing these new products beyond our current operational areas along with other associated risks during their initial growth phase. These risks include challenges in acquiring and retaining customers or intermediaries and maintaining effective control over our costs and expenses. Expanding into new markets may also impose additional demands on our management, administrative, financial, and operational resources. If we are unable to address these risks effectively, it could materially and adversely affect our business. Therefore, investors should take into account the risks, potential losses, and challenges we face as an early-stage company when evaluating our business and prospects. Additionally, our limited operating history may not offer a reliable basis for assessing our business, financial performance, future prospects, or for making informed investment decisions regarding our Equity Shares. For further details, please refer the chapter titled “*Objects of the Issue*” beginning on page 79 of this Draft Red Herring Prospectus.

6. We have not yet placed orders in relation to the funding Capital Expenditure towards Civil Construction on existing Unit construction for expansion which is proposed to be financed from the Issue proceeds of the IPO. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment in a timely manner, or at all, may result in time and cost over-runs and our business, prospects and results of operations may be adversely affected. Our proposed capacity expansion plans in our manufacturing facilities are subject to the risk of unanticipated delays in implementation due to factors including delays in construction, obtaining regulatory approvals in timely manner and cost overruns.

We have not yet placed orders for the plant and machinery required for our proposed expansion, as detailed in the “*Objects of the Issue*” beginning on page 79 of this Draft Red Herring Prospectus. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. However, as of now, final orders have not been placed for all plant and machinery totaling ₹1,769.82 Lakhs, which represents approximately [●]% and for Civil construction on existing unit for expansion amounting to ₹303.00 Lakhs of , which represents approximately [●]% the Issue Proceeds allocated for the expansion plan. The Company is also exposed to risks related to inflation in the prices of plant and machinery. Furthermore, as the funding for these acquisitions is contingent upon the receipt of Issue proceeds,

any delay in accessing these proceeds may result in a corresponding delay in the placement of orders. Delays in the procurement of these assets may result in a revised implementation timeline. Additionally, we may face risks related to inflation in the costs of plant and machinery, which could lead to both time and cost overruns, adversely impacting our operations. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations.

Furthermore, we have not yet executed any agreements with consultants for civil engineering work related to the proposed expansion. Delays in appointing these consultants could have a detrimental effect on our business operations. Negotiations regarding specifications with suppliers and architects for the civil work have commenced, and formal agreements will be finalized once these negotiations are completed and the proceeds from the Issue are received.

7. Our Company has applied for registration of the trademarks in its name i.e., Peshwa Maharaj and Shai Peshwa. Until such registration is granted, we may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill.

Our Company has made several applications under various classes for registration of our logo under the Trade Mark Act, 1999 which are pending as on date. The applications bearing numbers 6535356 and 6535357 under class 30 for registration

of our brand logo “” and “” under the Trade Mark Act, 1999 are sent to Vienna Codification as on date. There can be no assurance as to when the respective trademark applications are registered. Pending the registration of these trademarks, any other vendor in the similar line of business as ours may use the abovementioned trademarks and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, our applications for the registration of certain trademarks may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of any of our trademarks for which we have applied for registration, we may not be able to use such trademarks and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties, which may adversely affect our goodwill and business. For further details on the Trademark Application kindly refer to the section titled “*Business Overview*” and “*Government and Other Statutory Approvals*” beginning on page 114 and 192 respectively of this Draft Red Herring Prospectus.

8. Our company was incorporated on December 26, 2023, marking a relatively recent establishment and possessing only a brief history of conducting business activities and financial operations. This limited operating history may pose challenges in accurately assessing our past performance and projecting future prospects among investors.

Our company was incorporated as a Public Limited Company under the Companies Act, 2013, with the Registrar of Companies, Central Registration Centre issuing a certificate of incorporation on December 26, 2023. Due to our limited operating history, there is insufficient data available to fully evaluate our business, future prospects, and viability. Forecasting our future revenues and profitability is challenging, and we may encounter difficulty in achieving revenue growth or maintaining profitability on a quarterly or annual basis. Should this occur, it could adversely impact our financial condition and operating results.

Our current phase of growth exposes us to heightened risks across various fronts. Managing this growth will place significant demands on our management team, financial resources, and operational capabilities. We must continuously enhance our operational, financial, and internal controls to support sustainable growth. However, there is no guarantee that our growth strategies will be successfully executed or that they will yield the anticipated benefits in terms of increased revenue and profitability.

Furthermore, we may face challenges in developing adequate systems, infrastructure, and technologies, as well as in attracting and retaining talent to effectively manage our expansion. The inability to successfully implement our growth strategies or manage our growth trajectory could negatively impact our business prospects.

For more detailed information, please refer to the sections titled “*History and Corporate Structure*” and “*Restated Financial Statements*”, beginning on pages 144 and 174 respectively, of the Draft Red Herring Prospectus.

9. We rely on third-party transportation providers for the delivery of trading goods and materials both from our suppliers and to our clients. Any failure by these service providers to fulfill their obligations could materially adversely affect our business, financial condition, and operational results.

As wheat processing constitutes our primary business activity, our success is contingent upon the uninterrupted supply and transportation of materials from our suppliers to us and from us to our clients. These processes are subject to various uncertainties and risks. Any failure by these service providers to fulfill their obligations whether due to logistical issues,

labor strikes, vehicle breakdowns, or other unforeseen disruptions can lead to significant delays in the receipt of raw materials and the delivery of finished products. Such delays can halt production processes, leading to unmet client orders and potential loss of contracts, which in turn affects our revenue and market reputation.

Additionally, materials may be lost or damaged during transit due to factors such as accidents or natural disasters. Delays in the delivery of materials could also adversely impact our business and operational results. A failure to ensure a consistent and reliable supply of materials to both ourselves and our clients could materially and adversely affect our business, financial condition, and results of operations. We would like to emphasize on the fact that no such occurrence of disruption in transportation facilities have occurred in our business operations till now.

10. Our Company is eligible for tax benefit under GST Act, any withdrawal of such Tax Holiday under Chapter 11 of GST Rate & HSN Code for milling Industry products of the GST Act, 2017 may adversely affect our liquidity.

Presently we operate in the field of flour wheat products like Chakki Fresh Atta, Maida Flour, Suji and so on which are sold in the market under the brand name of “Shahi Peshwa” and “Peshwa Maharaj”. Our products covered under 1101 HSN code related to manufacturing or producing Wheat or meslin flour which are Tax Free on total supply of products from our side under Chapter 11 of GST Rate & HSN Code for milling Industry products of the GST Act, 2017. In the event this tax holiday is withdrawn the Company shall be liable to pay GST tax as applicable in those years, which may have an effect on the profitability of the company. When these tax benefits expire or terminate, our tax expense is likely to materially increase thereby impacting our profitability. Our profitability will be affected to the extent that such benefits will not be available. Our profitability may be further affected if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of these benefits.

11. We have had negative cash & cash equivalent generated in the financial year as stated below in the past based on the Restated Summary Information of our Company and we may, in the future, experience similar negative cash flows.

We have experienced negative cash & cash equivalent generated in the financial year as stated below based on the Restated Summary Information of our Company and we may, in the future, experience negative cash flows. The following table sets forth certain information relating to our cash flows for the periods indicated, based on the Restated Summary Statements of our Company:

(₹ In Lakhs)

Particulars	30.06.2024	31.03.2024		31.03.2023	31.03.2022
		26.12.2023-31.03.2024	01.04.2023-25.12.2023		
Net cash generated from/ (used in) operating activities.	(413.02)	(215.75)	(496.73)	32.17	(265.65)

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

For further details, see section titled “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages no. 174 and 179, respectively of this Draft Red Herring Prospectus.

12. Fluctuations in raw material prices caused by shortages or declines in quality due to natural factors could significantly impact the Company’s profit margins and operational performance.

Fluctuations in raw material prices, caused by shortages or declines in quality due to natural factors, could significantly impact the Company’s profit margins and operational performance. Variations in the price, availability, and quality of raw materials used in manufacturing standard products can adversely affect the cost of sales and our ability to meet customer demands. Prices for these products are heavily influenced by seasonal production, which can be unpredictable due to natural events such as monsoons and other calamities. Any shortages, supply disruptions, or decreases in the quality of raw materials whether due to natural causes or other factors could lead to higher production costs. If the Company cannot pass

these increased costs on to customers, it may result in a substantial negative effect on profit margins and overall operational performance.

13. Our Company's manufacturing processes are labour intensive and rely heavily on a substantial number of unskilled workers. If we encounter difficulties in sourcing or retaining these labourers, it could impact our business operations.

As of June 30, 2024, our Company employs 18 individuals, including top and middle management, as well as manufacturing and office staff. Additionally, we engage labour on daily wages to support our manufacturing operations.

Our company's manufacturing processes are labour-intensive and rely heavily on a substantial number of unskilled workers. This dependency presents a significant risk to our business operations. If we encounter difficulties in sourcing or retaining these labourers, it could severely disrupt our production capabilities. Factors such as labour shortages, increased competition for workers, rising wages, or unfavourable working conditions could make it challenging to maintain an adequate workforce. Additionally, reliance on unskilled labour means that any disruptions in workforce availability can immediately impact our production schedules and quality control, potentially leading to missed deadlines and compromised product standards. This can result in dissatisfied customers, loss of business, and harm to our reputation. To mitigate this risk, we have invested in improving working conditions, offering competitive wages, and implementing effective labour retention strategies.

Moreover, we may need to hire additional contract labour for specialized tasks or during peak periods of high customer demand. Currently, we do not have agreements in place for hiring additional labour, so the availability of suitably skilled workers cannot be guaranteed. Failure to secure the right labour could affect our operations and damage our client relationships.

14. Our continued operations are critical to our business and any slowdown or shutdown in our manufacturing operations could have an adverse effect on our business, results of operations and financial condition.

Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair the malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same. Any significant reduction in production capacity can lead to delayed or missed deliveries, causing dissatisfaction among our customers and potential loss of business. Additionally, a halt in operations can result in increased operational costs due to idle labour and machinery, while still incurring fixed costs such as rent and utilities. This mismatch between ongoing expenses and reduced revenue can strain our financial resources, negatively impacting profitability and cash flow.

We would like to clarify that no such event of slowdown or shutdown in our manufacturing operations have occurred in our organisation till date.

15. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price. Our promoters average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below.:

Sr. No.	Name of Promoters	No of Equity Shares held	Weighted Average Cost of Acquisition (in ₹) *
1.	Rahat Ali Saiyed	31,00,000	5.00
2.	Sadaf Saiyed	29,00,000	5.00
3.	Shehnaj	21,38,000	5.00
4.	Riyazuddin Qureshi	18,60,000	5.00
5.	Mo Jed	6,20,000	5.00

**The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them, by way of fresh issuance or transfer, the Equity Shares less amount received by them for the sale of Equity Shares through transfer, if any and the net cost of acquisition has been divided by total number of shares held as on date of the Draft Red Herring Prospectus.*

**As certified by M/s Doshi Doshi & Co., Chartered Accountants vide their certificate dated July 29, 2024.*

16. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition.

Any failure in our quality control processes may adversely affect our business, results of operations, and financial condition. Our manufacturing processes for wheat products depend heavily on stringent quality control measures to ensure that the final products meet safety, health, and quality standards. These measures include verifying that raw materials conform to predefined samples, monitoring production parameters, and conducting regular inspections and tests.

If our quality control processes fail at any stage be it during the procurement of raw wheat, its storage, milling, or packaging the consequences can be severe. Contaminated or substandard wheat can lead to the production of inferior or unsafe flour products, which may result in product recalls, legal liabilities, and health hazards for consumers. Such incidents can damage our brand reputation, lead to loss of consumer trust, and result in decreased sales.

Additionally, failing to detect and address quality issues promptly can disrupt production schedules, increase waste, and incur additional costs for reprocessing or disposing of defective products. This can negatively impact our operational efficiency and profitability. Ensuring that raw materials match the confirmed samples and maintaining rigorous quality control throughout the manufacturing process is critical to safeguarding our business operations and financial health.

17. We use raw materials that are vulnerable to fire hazards, creating a potential risk of significant loss to our business.

We use raw materials that are highly vulnerable to fire hazards, creating a significant risk of loss to our business. Wheat and other grain products, which are primary components in our manufacturing process, are highly flammable. A fire incident in our storage or production facilities could lead to substantial loss of raw materials, halt production, and cause extensive damage to equipment and infrastructure. This would not only disrupt our operations but also result in significant financial losses due to the cost of replacing materials and rebuilding damaged facilities.

Additionally, our raw materials are susceptible to damage from moisture, water, natural causes, pests, and excessive use of pesticides. Improper storage conditions can lead to moisture accumulation, causing mold growth and spoilage, rendering the raw materials unusable. Water damage from leaks or floods can similarly compromise the quality and usability of our stock. Natural causes such as temperature fluctuations and humidity can also affect the integrity of the stored materials.

Pest infestations present another critical risk, as they can lead to contamination and loss of large quantities of raw materials. Furthermore, excessive use of pesticides during farming or storage can result in chemical contamination, making the raw materials unsafe for use and leading to regulatory issues and health hazards.

To mitigate these risks, we have implemented comprehensive insurance coverage for our raw materials. Additionally, we have established stringent storage protocols and regular inspections to ensure optimal storage conditions and minimize the risk of moisture, pest infestation, and other forms of damage. Through these measures, we aim to safeguard our raw materials, ensure uninterrupted production, and protect our business from potential financial and operational setbacks.

18. Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of certain secured borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.

Our Company intends to utilise a part of the Net Proceeds for repayment or pre-payment in full or in part, of certain secured borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net Proceeds have been disclosed in the section titled “*Objects of the Issue*” beginning on page 79 of this Draft Red Herring Prospectus. While we believe that utilization of Net Proceeds for repayment of secured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre-payment of loans will not result in the creation of any tangible assets for our Company.

19. If our Company is unable to adequately protect its intellectual property or if it inadvertently infringes on the intellectual property rights of others, it could have an adverse effect on our business. This could include potential legal disputes, financial liabilities, or damage to our reputation, all of which could negatively impact our operations and financial performance.

The success of our Company is heavily reliant on our brand name and brand image, making our trademark crucial for distinguishing our products from those of our competitors. We have filed for trademark registration and logo protection under the Trademarks Act, 1999. However, our trademark and logo, which are still awaiting approval, may be vulnerable to counterfeiting or imitation. Such issues could harm our reputation, lead to a loss of customer trust, decrease sales, and increase administrative costs.

There is no guarantee that third parties will not infringe on our intellectual property, potentially damaging our business prospects, reputation, and goodwill. Our efforts to protect our intellectual property may prove inadequate, potentially

eroding our business value and adversely affecting our operations. We may need to engage in litigation to address claims and determine the scope of proprietary rights, which could be both time-consuming and costly, with uncertain outcomes. Moreover, we might not be able to detect unauthorized use promptly or take effective measures to enforce or safeguard our intellectual property, which could negatively impact our business, operational results, and financial condition.

The details of applied trademark are as follows:

Sr. No.	Word/Logo/Mark/ Design*	Trademark Type	Trademark	Class	Application No./ Trademark No.	Application Date/ Issue Date	Current Status
1.		Device	PESHWA MAHARAJ	30	6535356	20/07/2024	Send To Vienna Codification
2.		Device	SHAHI PESHWA	30	6535357	20/07/2024	Send To Vienna Codification

20. If we are unable to maintain and enhance our brand and reputation, the sales of our products may suffer which would have a material adverse effect on our business operations.

Our business depends significantly on the strength of our brand and reputation in marketing and selling our products. We also believe that maintaining and enhancing the “Shahi Peshwa”, “Peshwa Maharaj”, “Royal Peshwa” and “Peshwa Gold” brand that are critical to maintain and expand our customer base out of which the brand name of “Royal Peshwa” and “Peshwa Gold” have not yet applied for trademark registration that are critical to maintain and expand our customer base. We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects. In addition, adverse publicity about any regulatory or legal action against us could damage our reputation and brand image, undermine our consumers’ confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations.

21. Failure to fully utilize our manufacturing capacities, including our expanded facilities, could negatively impact our business, prospects, and future financial performance.

As on June 30, 2024, we own and operate manufacturing facility located in Plot No. 5, Industrial Growth Centre Apparel Cluster, Survey Number 137/1/1/1 P, Village Bijepur, Tehsil Depalpur, Distt. Indore, Madhya Pradesh, India. This facility collectively has an installed production capacity of approximately 170 Tons/Day and Capacity Utilisation as 153 Tons/Day as per the chartered engineer certificate received from Akhilesh Pandit, Chartered Engineer, Surveyor and Valuer by issuing Chartered Engineer’s Certificate dated July 27, 2024. Our ability to utilize this capacity effectively depends on continuous operations at our plants, the availability of raw materials, market conditions, and the specific product demands and procurement practices of our customers.

Any prolonged disruptions at our plants, such as interruptions in water or electricity supply, labor unrest, or insufficient availability of raw materials, could hinder our ability to achieve full capacity utilization. This could lead to operational inefficiencies that may significantly impact our business and financial condition adversely.

22. Failure to manage our stock effectively could significantly impact our net sales, profitability, cash flow, and liquidity. Proper inventory management is crucial for maintaining operational efficiency and ensuring that we can meet market demand without excess or shortage.

All products we manufacture are intended for human consumption, they are inherently vulnerable to risks such as contamination, adulteration, and tampering during various stages, including production, transportation, and storage. Our

production processes and facilities must adhere to stringent food safety regulations, requiring that both raw materials and finished products be stored, handled, and transported under specific temperature conditions and in compliance with established safety standards.

Any lapses in these critical areas whether caused by negligence, human error, or other unforeseen issues could compromise the quality and safety of our products. Such shortcomings could lead to non-compliance with applicable regulatory standards, which are designed to protect consumer health and safety.

Moreover, if allegations arise that our products are contaminated or otherwise unsafe, regardless of whether these claims are substantiated, they could severely damage our reputation and erode consumer trust. This could have a direct adverse effect on our sales and may lead to legal proceedings against us, potentially involving significant financial and operational repercussions. Therefore, maintaining rigorous quality control and adhering to regulatory requirements is essential to mitigating these risks and ensuring the ongoing success and integrity of our business.

23. We may be exposed to risks associated with misconduct, fraud, and trading errors by our employees and business associates.

We may be exposed to risks associated with misconduct, fraud, and trading errors by our employees and business associates. Such risks include unethical behaviour, financial fraud, and errors in trading activities that could lead to financial losses, legal issues, and damage to our reputation. Misconduct can involve actions like unauthorized transactions or breaches of internal controls, while trading errors, such as incorrect data entry or misinterpretation of market information, can result in significant financial discrepancies and operational disruptions. While we have not yet experienced any such events, the potential for these risks necessitates vigilance and the implementation of robust monitoring and control mechanisms to protect our business interests and maintain operational integrity.

24. Our inability to manage inventory in an effective manner could affect our business.

Our business model requires us to maintain a certain level of inventory to meet the present and future orders. Wheat is the key raw material used to manufacture all of our products. We procure wheat grain from Madhya Pradesh primarily directly from farmers. There can be no assurance that we will be able to procure all of our future raw material requirements at commercially viable prices. We are bound by the orders and directions issued by the Food Corporation of India (“FCI”), the government's nodal agency for procurement and distribution of wheat. In order to control the prices of food grains including wheat, FCI and other governmental nodal agencies prescribe guidelines for procurement of wheat which include limits to which wheat can be stocked by us or our suppliers. Therefore, the quantity of the inventory which can be stocked by us and the price at which we procure wheat from our suppliers are susceptible to fluctuation on account of regulation by FCI and other governmental authorities.

Further, we may not be able to stock adequate quantity of raw materials required by our Company. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

25. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations and financial condition.

We have experienced considerable growth over the past years and we have significantly expanded our operations and product portfolio. Our Company has recorded net profit after tax of ₹403.91 Lakhs in the period ended June 30, 2024 and ₹567.25 Lakhs, ₹99.55 lakhs and ₹12.57 Lakhs respectively in the year ended 2024, 2023 and 2022. We cannot assure you that our growth strategy will continue to be successful or that we will be able to continue to expand further, or at the same rate.

Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations, and financial condition. As our company expands, we face several challenges, including scaling our operations, maintaining product quality, and ensuring efficient supply chain management. Effective growth management requires robust infrastructure, advanced technology, and a skilled workforce. Inadequate planning or execution in these areas can lead to operational inefficiencies, higher costs, and reduced profitability.

Additionally, growth often necessitates entering new markets or introducing new products, which involves understanding diverse customer preferences, navigating regulatory requirements, and competing with established players. If we fail to accurately assess and respond to these market dynamics, our expansion efforts may not yield the anticipated results,

potentially affecting our revenue and market share. Implementing our business plan and growth strategy also demands substantial investment in marketing, research and development, and human resources. Misallocation of resources or delays in these initiatives can hinder our ability to capitalize on growth opportunities. Furthermore, rapid growth can strain our existing systems and processes, leading to disruptions in service delivery and customer satisfaction.

Despite these challenges, we are committed to managing our growth strategically. By continuously refining our business plan, investing in technology and talent, and maintaining a customer-centric approach, we aim to navigate the complexities of expansion effectively. While there are inherent risks, we believe that with careful planning and execution, we can achieve sustainable growth that enhances our business performance and financial health.

26. We operate in competitive markets characterized by low barriers to entry, which could heighten competition and materially adversely affect our business, financial condition, and operational results.

Our market segments are highly competitive and fragmented, involving numerous participants. In the food product sector, we compete with both multinational and Indian companies that hold significant market shares, as well as a multitude of smaller competitors. The availability of free information online about food manufacturing also poses a competitive threat. Furthermore, the barriers to entry in our market segments are relatively low despite the high investment costs, which we anticipate will drive increased competition from both established players and new entrants. This heightened competition could also result in staff attrition to rival companies or employees starting their own competitive ventures.

27. The business of the Company is seasonal in nature and hence the Company requires substantial working capital for maintaining the stocks. Any shortage in working capital finance will affect the operations of the company and have an impact on the profitability.

Our raw materials are derived from wheat, an agricultural product that depends on specific seasonal and weather conditions for growth. Consequently, our business operations may be influenced by seasonality, which could affect the comparability of our quarterly or half yearly results. The seasonal nature of the raw materials we use means that both seasonality and weather conditions can impact our business. Although we implement preventive measures such as planning procurement schedules and storing raw materials in controlled environments, we cannot guarantee that we will be able to fully manage the inherent seasonal fluctuations.

The Company is processing the products produced by the farmers, which is seasonal in nature. The Company has to build up the stocks of raw material for lean season; hence the requirement working capital is substantial. Any shortage in working capital finance will affect the operations of the company and have an impact on the profitability.

28. Our Company has not entered into any written agreements or contracts with our customers for sale of our products.

Our company has not entered into any written agreements or contracts with our customers for the sale of our products. This absence of formal contracts poses significant risks to our business operations and financial stability. Without written agreements, we lack legally binding commitments from our customers, which can lead to uncertainties in demand forecasting and revenue projections. This situation leaves us vulnerable to sudden order cancellations or changes in purchase volumes, disrupting our production schedules and inventory management. Additionally, the lack of formal contracts makes it challenging to enforce payment terms, increasing the risk of delayed or non-payments that can adversely affect our cash flow. Furthermore, in the absence of written agreements, resolving disputes over product quality, delivery timelines, or pricing becomes more complicated, potentially damaging our customer relationships and reputation. To mitigate these risks, establishing formal contracts with our customers is crucial for ensuring stable demand, predictable revenue streams, and clear terms of engagement.

29. Our operations are dependent on the supply of large amounts of raw material. We do not have long Term agreements with suppliers for our raw materials and any increase in the cost of, or a shortfall in the availability of, such raw materials could have an adverse effect on our business and results of operations, and seasonable variations could also result in fluctuations in our results of operations.

Our business depends on the availability of reasonably priced wheat. We source wheat from local farmers. The price and availability of wheat depend on several factors beyond our control, including overall economic conditions, paddy crop productivity in the season, market demand and competition for such materials, production and transportation cost, duties and taxes. In addition, we do not have long term supply contracts with any of our raw material suppliers and/or farmers and we typically place orders with them in advance of our anticipated requirements. The absence of long term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials from alternate suppliers in a timely fashion, or on commercially acceptable terms, may adversely affect our operations. If, for any reason, primary suppliers of raw materials curtail or

discontinue their delivery of such materials or products to us in the quantities we need, or on commercially acceptable terms, production schedules could be disrupted and our business and results of operations could be adversely affected.

30. Our management has discretion in how it may use the proceeds of the Issue. Any variation in the utilisation of our Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.

Our use of the proceeds of the Issue is at the discretion of the management of our Company. As described in the section titled “*Objects of the Issue*” beginning on page no. 79 of this Draft Red Herring Prospectus, we intend to use the Net Proceeds for various purposes, including but not limited to, (i) Purchase of Plant & Machineries for installation at existing manufacturing unit; (ii) Civil Construction on existing unit for expansion; (iii) Repayment/pre-payment, in part or full, of certain of our borrowings; (iv) To meet Working Capital Requirements and (v) General Corporate Purposes. However, we have not entered into any definitive agreements and do not have any definite and specific commitments towards the aforementioned purposes for which our Company intends to use the Net Proceeds. Further, the Net Proceeds are intended to be utilized by the Company only and none of the members of our Promoter Group or Group Companies will receive any portion of the Net Proceeds. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. Any variation in the planned use of the Net Proceeds would require Shareholders' approval and may involve considerable time or cost overrun and in such an eventuality it may adversely affect our operations or business. In the event that there is such a change in the objects of the Issue, our Promoter shall provide an exit offer to dissenting shareholders as provided for in the Companies Act, 2013 and in terms of the conditions and manner prescribed under the SEBI ICDR Regulations.

31. Even after the completion of the Issue, our Promoters and certain affiliated entities will continue to retain control over the Company.

As of the date of this Draft Red Herring Prospectus, our Promoters, Rahat Ali Saiyed, Sadaf Saiyed, Shenaz, Riyazuddin Qureshi and Mo. Jed together hold 77.34% of the issued, subscribed, and paid-up equity share capital of our Company. Upon completion of the Issue, our Promoter and select members of the Promoter Group will own 1,06,18,000 of our equity share capital, enabling them to continue directing the outcomes of matters presented to our Board or shareholders for approval. Consequently, after this Issue, our Promoters will retain significant control and influence over the Company's operations and key policy decisions, including, but not limited to:

- Overseeing the election of directors;
- Managing the selection of senior management;
- Approving major corporate transactions, such as asset or business acquisitions and disposals, or change of control transactions;
- Making key strategic and investment decisions;
- Sanctioning our annual budgets; and
- Amendment to our Memorandum and Articles of Association.

The interests of our Promoters and certain members of the Promoter Group may conflict with your interests and the interests of our other shareholders, and our Promoters and certain members of the Promoter Group could make decisions that may adversely affect our business operations and hence the value of your investment in the Equity Shares.

32. Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain personnel with technical expertise. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them could adversely affect our business, financial condition and results of operations.

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoters, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoter for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

In addition, we may require a long period of time to hire and train replacement personnel when personnel with technical expertise terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining personnel with technical expertise that our

business requires. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see *“Our Management”* beginning on page 148 of this Draft Red Herring Prospectus.

33. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Company / Entities.

Our Promoters and Directors are interested in our Company to the extent of their shareholding and dividend entitlement, if any, thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered between our Company and themselves as well as between our Company and Our Group Company which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Company / Entities during last three years, please refer to the “Annexure 28-Related Party Transaction” under the Chapter titled *“Restated Financial Statements”* beginning on page 174 this Draft Red Herring Prospectus.

34. Insurance coverage of our company may be insufficient to protect against certain operational risks, which could adversely affect our business results.

We maintain insurance coverage for risks associated with our manufacturing business through various policies. While we believe that our assets and stock are adequately insured, there can be no guarantee that our insurance will always be effective or sufficient. We cannot assure that any claims under our insurance policies will be fully, partially, or timely honoured to cover all material losses. To the extent that we incur losses or damages not covered by insurance or that exceed our insurance limits, our business and operational results could be adversely impacted. For further details regarding our insurance policies, please refer to page 114 in the chapter titled *“Business Overview”* of this Draft Red Herring Prospectus.

35. Our capacity to uphold our competitive position and execute our business strategy relies significantly on our senior management team and other key personnel.

Our strategy implementation and daily operations heavily rely on our current senior management team. Additionally, the relationships that senior management members have are crucial to our business. Competition for experienced management personnel in our industry is fierce, and the pool of qualified candidates is limited. As a result, we may face challenges in retaining our senior executives or key personnel or in attracting new, skilled individuals. Therefore, there is no guarantee that these individuals will continue to provide their services in the future. A significant loss of senior management or key personnel could have a serious adverse impact on our business, financial condition, operational results, and future prospects. Moreover, if any senior management member or key personnel were to join a competitor or start a competing business, we might lose valuable proprietary knowledge to our competitors. Our success is also heavily dependent on our Promoter, who has been leading the company since its inception. Serving as our Managing Director, our Promoter's experience and vision have been pivotal in achieving our current market position. If our Promoter is unable or unwilling to continue in this role, we might struggle to find a suitable replacement, which could materially and adversely affect our business, financial condition, operational results, and future prospects.

36. We face competition within the domestic market, and failing to compete effectively could have a substantial negative impact on our business, financial health, and operational performance.

We face competition in our industry based on pricing, customer relationships, product quality, and customization. We face pricing pressure from competitors who can produce similar products at lower costs and, as a result, offer their products at cheaper prices. We cannot guarantee that we will be able to meet these pricing pressures from domestic competitors, which could negatively impact our business, financial condition, and operational results. Furthermore, some of our competitors may have more substantial financial, research, and technological resources, larger sales and marketing teams, and a more established reputation. They might also be better equipped to identify market trends, adapt to industry

changes, innovate and develop new products, offer competitive prices due to economies of scale, and ensure high product quality and compliance.

37. If we fail to manage our growth efficiently and extend our presence into new markets, it could have a substantial negative effect on our business, future financial performance, and overall operational outcomes.

Our business success depends on our ability to effectively execute our business and growth strategy. As part of this strategy, we plan to expand our operations whenever opportunities arise, which includes enhancing our product portfolio with promising growth and profitability potential, pursuing cost efficiency, attracting and retaining skilled employees, and consistently maintaining high-quality standards.

As we continue to grow and enter new markets, we may encounter several challenges, including:

- Acquiring new customers
- Understanding customer requirements and preferences in these new markets
- Securing necessary approvals and certifications for our products in different jurisdictions
- Accurately assessing the resources needed
- Maintaining a consistent culture, values, and work environment
- Enhancing our internal administrative infrastructure, including financial, operational, communication, internal control, and other systems
- Recruiting, training, and retaining skilled management, technical, and marketing personnel
- Ensuring high levels of customer satisfaction
- Meeting performance and quality standards

38. We have significant power requirements for continuous running of our manufacturing unit. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an adverse effect on our business, results of operations and financial condition.

We have significant power requirements for the continuous operation of our manufacturing unit. Any disruption to our power supply such as outages or interruptions can halt our production processes, leading to operational delays and increased costs. Such disruptions can cause downtime, which may result in missed production targets, delayed order fulfilment, and potential loss of business. Additionally, irregular or significant hikes in power tariffs can substantially increase our operational expenses, affecting our overall financial condition. Rising energy costs can erode profit margins and make it challenging to maintain competitive pricing. To mitigate these risks, ensuring a reliable power supply and managing energy costs effectively is crucial for sustaining uninterrupted operations and financial stability. Implementing backup power solutions, such as generators or alternative energy sources, and negotiating favourable power tariff agreements can help minimize the impact of power-related disruptions on our business. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “*Business Overview*” beginning on page 114 of this Draft Red Herring Prospectus.

39. Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, “*Government and Other Approvals*” beginning on page 192 of this Draft Red Herring Prospectus.

40. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals.

Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 79 of this Draft Red Herring Prospectus.

41. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than ₹10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoter shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same.

Pursuing our growth strategy will also necessitate additional capital investments and cash expenditures, which could significantly impact our cash flows and operational results.

EXTERNAL RISK FACTORS

After this Issue, the price of the Equity Shares may experience significant volatility, or an active trading market for the Equity Shares may not emerge.

The Equity Share price on the stock exchange could fluctuate due to factors such as:

- Volatility in Indian and global capital markets
- The Company’s operational results and financial performance
- The performance of the Company’s competitors
- Negative media coverage of the Company
- Changes in our performance estimates or financial analysts' recommendations
- Significant developments in India's economic and fiscal policies
- Major changes in India's environmental regulations

Current valuations may not be sustainable or indicative of future values for our industry and the Company. There is no guarantee that an active trading market for the Equity Shares will develop or be maintained after this Issue, or that the initial trading price will align with future market prices.

42. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.

The occurrence of natural disasters, including floods, earthquakes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition. The spread of pandemic diseases, or the occurrence of natural disasters, in India or the international markets we purchase, could restrict the level of economic activities generally or slow down or disrupt our business activities, which could in turn adversely affect our business, financial condition and results of operations.

43. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

44. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page no. 136 of this Draft Red Herring Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

45. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

46. Our Total Revenue is derived from business in India for period ended June 30, 2024 and a decrease in economic growth in India could cause our business to suffer.

At present, we derive 100.00% of our revenue from operations in India ended June 30, 2024 and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

47. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

48. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Ekadrisht Capital Private Limited as Book Running Lead Manager for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

49. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index - based market - wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

50. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹[●]/-. This price is being based on numerous factors (For further information, please refer chapter titled “*Basis for Issue Price*” beginning on page no. 93 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following: Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues; Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community; General market conditions; and Domestic and international economic, legal and regulatory factors unrelated to our performance.

51. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates / slab will continue in the future. Any changes in these tax rates / slabs could adversely affect our financial condition and results of operations.

52. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding Rs.1,00,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long gains tax in India. Term capital The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a nondelivered basis is specified at 0.003% of the consideration amount.

The Finance Act, 2020, has, among o others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Comp any may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

53. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

54. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

56. Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

57. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity markets as well generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

58. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%

GLOBAL ECONOMY

Global growth is projected to be in line with the April 2024 World Economic Outlook (WEO) forecast, at 3.2 percent in 2024 and 3.3 percent in 2025. However, varied momentum in activity at the turn of the year has somewhat narrowed the output divergence across economies as cyclical factors wane and activity becomes better aligned with its potential. Services price inflation is holding up progress on disinflation, which is complicating monetary policy normalization. Upside risks to inflation have thus increased, raising the prospect of higher-for-even-longer interest rates, in the context of escalating trade tensions and increased policy uncertainty. To manage these risks and preserve growth, the policy mix should be sequenced carefully to achieve price stability and replenish diminished buffers.

Global activity and world trade firmed up at the turn of the year, with trade spurred by strong exports from Asia, particularly in the technology sector. Relative to the April 2024 WEO, first quarter growth surprised on the upside in many countries, although downside surprises in Japan and the United States were notable. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter. In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year’s rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors wane and activity becomes better aligned with its potential.

Figure 1. Sequential Core Inflation
(Percent; three-month-over-three-month, annualized)

Sources: Haver Analytics, and IMF staff calculations.
Note: The two aggregates are the purchasing-power-parity-weighted averages.
Sample includes 11 advanced economies and 9 emerging market and developing economies that account for approximately 55 percent of 2021 world output at purchasing-power-parity weights.

Meanwhile, the momentum on *global disinflation* is slowing, signaling bumps along the path. This reflects different sectoral dynamics: the persistence of higher-than-average inflation in services prices, tempered to some extent by stronger disinflation in the prices of goods (Figure 1). Nominal wage growth remains brisk, above price inflation in some countries, partly reflecting the outcome of wage negotiations earlier this year and short-term inflation expectations that remain above target. The uptick in sequential inflation in the United States during the first quarter has delayed policy normalization. This has put other advanced economies, such as the euro area and Canada, where underlying inflation is cooling more in line with expectations, ahead of the United States in the easing cycle. At the same time, a number of central banks in emerging market economies remain cautious in regard to cutting rates owing to external risks triggered by changes in interest rate differentials and associated depreciation of those economies’ currencies against the dollar.

Global financial conditions remain accommodative. Although longer-term yields have generally drifted upward, in tandem with the repricing of policy paths, buoyant corporate valuations have kept financial conditions accommodative, broadly at the level of the April WEO. The increase in yields is likely to put pressure on fiscal discipline, however, which in some countries is already strained by the inability to rein in spending or raise taxes.

Overall, risks to the outlook remain balanced, as in the April 2024 WEO, but some near-term risks have gained prominence. These include upside risks to inflation that stem from a lack of progress on services disinflation and price pressures emanating from renewed trade or geopolitical tensions. Risks of persistent inflation in the services sector are tied to both wage and price setting, given that labor accounts for a high share of the costs in that sector. Higher nominal wage growth, which in some cases reflects the catch-up of real wages, if accompanied by weak productivity, could make it difficult for

firms to moderate price increases, especially when profit margins are already squeezed. This could lead to further stickiness in wage and price inflation. The escalation of trade tensions could further raise near-term risks to inflation by increasing the cost of imported goods along the supply chain. Bumpiness along the remaining disinflation path could destabilize the return to price stability if short term expectations spike upward as a result of disappointing inflation data.

Future-Proofing the Economy

As output gaps start to close and inflation recedes, policymakers face two tasks: persevering with restoring price stability and addressing the legacies of recent crises, including replenishing lost buffers and durably uplifting growth. In the near term, this will require careful calibration and sequencing of the policy mix. In countries where upside risks to inflation—including those arising through external channels—have materialized, central banks should refrain from easing too early and remain open to further tightening should it become necessary. Where inflation data encouragingly signal a durable return to price stability, monetary policy easing should proceed gradually, which would simultaneously provide room for the required fiscal consolidation to take place. Fiscal slippages over the past year in some countries could require a stance significantly tighter than envisaged. As the space for fiscal maneuver narrows, commitments to achieving fiscal consolidation targets should be earnestly adhered to, aided by sound fiscal frameworks and resource mobilization.

In emerging market and developing economies, recent policy divergences highlight the need to manage the risks of currency and capital flow volatility. Given that economic fundamentals remain the main factor in dollar appreciation, the appropriate response is to allow the exchange rate to adjust, while using monetary policy to keep inflation close to target. Foreign reserves should be used prudently and preserved to deal with potentially worse outflows in the future, in line with the IMF's Integrated Policy Framework. To the extent possible, macroprudential policies should mitigate vulnerabilities from large exposures to foreign-currency-denominated debt.

 9/ The assumed inflation rate for the euro area is 2.4% in 2024 and 2.1% in 2025, that for Japan is 2.4% in 2024 and 2.0% in 2025, and that for the United States is 3.1% in 2024 and 2.0% in 2025.

Near-term challenges aside, policymakers must act *now* to revitalize declining medium-term growth prospects. Striking differences in productivity trends across countries since the pandemic suggest that not all factors are cyclical and that decisive policy action is needed to enhance business dynamism and reduce resource misallocation to arrest weaknesses. Further boosting labor supply, especially by better integrating women and immigrants—key segments contributing to economic resilience in advanced economies—will mitigate demographic pressures, adding to potential growth gains. While emigration of the young and educated population can take a toll on source countries, the costs can be mitigated. Policies that help leverage diaspora networks, maximize the benefits from remittances, and expand domestic labor market opportunities are Finally, the misuse of inward and domestically oriented policies compromises the ability to tackle global challenges—such as climate change—in regard to which multilateral cooperation and trade are vital. These policies are also often inadequate to address domestic issues, as they increase fiscal pressures and risk further distortions such as

resource misallocation. All countries should thus scale back on use of trade-distorting measures and strive instead to strengthen the multilateral trading system.

OVERVIEW OF THE INDIAN ECONOMY

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth.

The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

WHEAT MARKET IN INDIA

Wheat is one of the main [staple crops](#) and is important for the food economy in India. It is the most consumed crop after rice by the Indian population. When India gained independence in 1947, wheat output and productivity were extremely low. Therefore, India used to import a large quantity of wheat from different nations to meet the country's demands. After the Green Revolution in the late sixties, wheat production in India became self-sufficient due to various government initiatives. Currently, the nation produces far more wheat than is needed, and warehouses overflow with grain. As a result, India is ranked third in [global wheat production](#). The wheat crop is cultivated in the Rabi (winter) season and harvested in the spring or summer season. Moreover, there are about 448 varieties of wheat grown in India.

Wheat cultivation in India has traditionally been dominated by the northern region of India. The northern states of Punjab and Haryana Plains in India have been prolific wheat producers. While this cereal grass has been studied carefully in the past, recent years of painstaking research by India's finest scientific talent have paid off with the development of distinctly superior varieties of Durum Wheat.

This hard wheat is cultivated in clayey soil and is highly sought after for its physical characteristics. Its high gluten strength and uniform golden color make it ideal for bread making and pasta preparation unlike the softer commercially high-yielding wheat, which lacks the strength and consistency of durum. Today, India is exporting sufficient quantities of all types of wheat and extensive research efforts are underway for improving its cereals and grain output in the years to come. Wheat cultivation has traditionally been dominated by the northern region of India. The northern states of Punjab and Haryana Plains in India have been prolific wheat producers. While this cereal grass has been studied carefully in the past, recent years of painstaking research by India's finest scientific talent have paid off with the development of distinctly superior varieties of Durum Wheat. With production reaching ten times in the past five years, India is today the second-largest wheat producer in the whole world. Various studies and researches show that wheat and wheat flour play an increasingly important role in the management of India's food economy.

The main varieties of wheat grown in India are as follows VL-832, VL-804, HS-365, HS-240 , HD2687, WH-147, WH-542, PBW-343, WH-896(d), PDW-233(d), UP-2338, PBW-502, Shresth (HD 2687), Aditya (HD 2781), HW-2044, HW-1085, NP-200(di), HW-741.

Areas of Cultivation:

Major wheat-growing states in India are Uttar Pradesh, Punjab, Haryana, Madhya Pradesh, Rajasthan, Bihar and Gujarat.

India Facts and Figures:

World trade in wheat is greater than for all other crops combined. The demand for India's wheat in the world shows a rising trend. The country has exported 188287.99MT of wheat to the world for the worth of Rs. 470.83 crores/ 56.66 USD Millions during the year 2023-24.

AGRICULTURE AND FOOD INDUSTRY AND EXPORTS

INTRODUCTION

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India’s population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country’s population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry.

The Indian food processing industry accounts for 32% of the country’s total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth. Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). India is the world’s 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23.

MARKET SIZE

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world’s sixth largest, with retail contributing 70% of the sales. As per the First Advance Estimates for 2023-24 (Kharif only), total foodgrain production in the country is estimated at 148.5 million tonnes.

Rabi crop area has from 709.09 lakh hectares in 2022-23 to 709.29 lakh hectares in 2022-23. In 2022-23 (as per the second advance estimate), India's horticulture output is expected to have hit a record 351.92 million tonnes (MT), an increase of about 4.74 million tonnes (1.37%) as compared to the year 2021-22. The Agriculture and Allied industry sector witnessed some major developments, investments, and support from the Government in the recent past. Between April 2000-March 2024, FDI in agriculture services stood at US\$ 3.08 billion.

According to the Department for Promotion of Industry and Internal Trade (DPIIT), the Indian food processing industry has cumulatively attracted a Foreign Direct Investment (FDI) equity inflow of about US\$ 12.58 billion between April 2000-March 2024. This accounts for 1.85% of total FDI inflows received across industries.

During 2023-24 (April-March), processed vegetables accounted for US\$ 652.42 million, miscellaneous processed items accounted for US\$ 1,652.22 million and processed fruits & juices accounted for US\$ 970.93 million. Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

In terms of exports, the sector has seen good growth in the past year. India’s agricultural and processed food products exports stood at US\$ 35.18 billion in 2023-24 (April-December).

The exports for principal commodities in 2023-24 (April-March) were the following:

- Marine Product: US\$ 7.37 billion
- Basmati and Non-Basmati Rice: US\$ 10.43 billion
- Spices: US\$ 4.25 billion

Road Ahead

The agriculture sector in India is expected to generate better momentum in the next few years due to increased investment in agricultural infrastructure such as irrigation facilities, warehousing, and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to the concerted effort of scientists to get early maturing varieties of pulses and the increase in minimum support price.

In the next 5 years, the central government will aim US\$ 9 billion in investments in the fisheries sector under PM Matsya Sampada Yojana. The government is targeting to raise fish production to 220 lakh tonnes by 2024-25. Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP), and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

Wheat processing into flour involves several key steps. First, harvested wheat grains are cleaned to remove impurities such as stones, chaff, and other foreign materials. The cleaned wheat is then tempered with water to achieve the desired moisture content, making it easier to separate the bran and germ from the endosperm. Next, the wheat is milled through a series of rollers that progressively break down the grain into finer particles. The endosperm is ground into flour, while the bran and germ are sifted out and collected as by-products. The resulting flour is then subjected to quality control checks to ensure it meets specified standards before packaging and distribution. The by-products of this process, primarily bran, are not wasted. Bran, rich in fiber, is often sold as a nutritional supplement for human consumption or as animal feed. The by-products are valuable commodities, generating additional revenue streams and contributing to waste minimization in the wheat processing industry.

1. **Atta-wheat flour:** Atta is made from whole wheat grains and retains all parts of the grain, including the bran, germ, and endosperm. This makes it a more nutritious option compared to refined flours, as it preserves the fiber, vitamins, and minerals found in wheat. The process of making atta ensures that the flour is coarse, suitable for making traditional unleavened breads, and maintains the natural color and taste of wheat.

Process of Making Atta:

a) Selection and Cleaning:

- **Wheat Selection:** High-quality wheat grains are selected based on their type, color, and hardness. Hard wheat varieties are typically preferred for making atta due to their higher gluten content.
- **Cleaning:** The selected wheat grains are thoroughly cleaned to remove impurities such as dirt, stones, and other foreign materials. This cleaning process often involves the use of air streams, sieves, and aspirators.

b) Conditioning:

- **Moisture Adjustment:** The cleaned wheat grains are conditioned by adjusting their moisture content. This is done by adding water to the grains and allowing them to rest for a specific period. The conditioning helps in achieving the desired texture and quality of the flour.
- **Resting:** The conditioned wheat is left to rest for a period to allow the moisture to evenly distribute, making the grains easier to grind and ensuring better milling efficiency.

c) Milling:

- **First Stage - Coarse Grinding:** The conditioned wheat is fed into a roller mill, where it is first ground coarsely. In this stage, the wheat grains are crushed to break them into smaller particles.
- **Separation:** After coarse grinding, the flour is sifted using a series of sieves and air classifiers to separate the bran (the outer layer), germ (the nutrient-rich core), and endosperm (the starchy part).
- **Second Stage - Fine Grinding:** The endosperm is further ground into finer particles. The aim is to achieve a consistent texture suitable for making atta.
- **Blending:** The ground flour is blended to achieve a uniform texture and quality. This may involve mixing different batches or adjusting the particle size.

d) Sifting and Classification:

- **Sifting:** The ground flour is sifted through mesh screens to remove any remaining coarse particles and ensure a fine, uniform texture.
- **Classification:** The atta is classified based on its fineness and quality. Different grades of atta may be produced depending on the milling process and the intended use.

e) Packaging:

- **Quality Check:** The final atta is subjected to quality checks to ensure it meets the required standards for texture, color, and nutritional content.
- **Packaging:** The atta is then packaged in clean, dry, and airtight containers or bags to maintain its freshness and prevent contamination.

f) Storage and Distribution:

- **Storage:** The packaged atta is stored in a controlled environment to prevent moisture absorption and spoilage.
- **Distribution:** The atta is distributed to retailers, wholesalers, and consumers, ready for use in cooking and baking.

- 2. Chokar/Wheat Bran-** Chokar is the coarse, fibrous outer layer of the wheat kernel that is removed during the milling process. It contains a significant amount of fiber, including both soluble and insoluble fibers, which are beneficial for digestive health. It also includes essential nutrients like B vitamins, iron, and antioxidants. Chokar has a rough texture and a brown color, and it is typically used in applications where its high fiber content is advantageous.

The production of chokar (wheat bran) involves selecting and cleaning wheat, conditioning it, and then milling it to separate the bran from the endosperm and germ. The bran is further processed and packaged to ensure it retains its nutritional benefits and is suitable for various applications. Chokar is a valuable byproduct of the flour milling process, known for its high fiber content and various health benefits.

- 3. Suji/Rawa (Semolina)-** Suji is characterized by its coarse, granular texture and light yellow color, which distinguishes it from finer wheat flours. It has a slightly nutty flavor and is known for its versatility in culinary applications. High-grade durum wheat is selected for suji production due to its hardness and high gluten content. The selected wheat undergoes thorough cleaning to remove impurities, including dust, stones, and other foreign materials. This is achieved using advanced cleaning equipment such as air classifiers, sieves, and aspirators.

Once cleaning is done, dampening is applied adding water to the wheat and allowing it to rest for a specified period. the wheat is processed through multiple sets of rollers and screens. The rollers crush the wheat into granular particles, and air classifiers and sifters separate the coarse semolina (suji) from finer flour and bran. The semolina is further ground and sifted to achieve the desired particle size and consistency. Once the processing is done, stage of quality checking arises to ensure it meets industry standards. This includes assessing its texture, color, and consistency. The last stage is packing and storing semolina, effective storage practices ensure the semolina remains in optimal condition until it reaches the end user.

- 4. Wheat Daliya-** Daliya is a whole grain product made from durum wheat kernels that undergo a meticulous production process to achieve its distinctive texture. The process of making Daliya involves Cleaning of the durum wheat kernels to remove any dirt, debris, or impurities. This step ensures that the final product meets high standards of cleanliness and food safety. Once cleaned, the wheat kernels are dehusked to remove their outer layers. This process helps in stripping away the tough outer husk, revealing the inner part of the kernel.

After cleaning and dehiscing, the wheat kernels are then cracked into small, coarse pieces. This cracking process involves passing the kernels through machinery that breaks them down into fragments of varying sizes. The degree of cracking can vary, resulting in different textures of wheat daliya—from fine to medium to coarse. Post-cracking,

the wheat fragments undergo sifting to separate any fine particles and ensure uniformity in size. The fragments are then graded based on their coarseness or fineness, catering to different culinary preferences and recipes.

Finally, the cracked wheat daliya is carefully packaged to maintain its freshness, quality, and nutritional integrity. This packaging ensures that the product reaches consumers in optimal condition, ready to be used in a variety of culinary applications.

5. **Maida-** It is also known as refined wheat flour or all-purpose flour, is a finely ground flour derived from wheat grains. It is distinguished by its soft texture, white appearance, and broad applicability in culinary practices.

Process of making Maida:

a) Cleaning and Milling:

The process commences with meticulous cleaning of wheat grains to eliminate impurities and foreign matter. Subsequently, the cleaned grains are milled to achieve a finely ground consistency.

b) Bleaching:

Maida undergoes a bleaching process to attain its characteristic white color. This process may involve the use of permitted bleaching agents such as benzoyl peroxide or chlorine dioxide.

c) Refinement

Post-bleaching, the flour undergoes further refinement to remove bran and germ, resulting in a refined texture suitable for a wide range of culinary applications.

d) Packaging

The refined maida flour is carefully packaged to maintain its quality and freshness, adhering to regulatory standards for food packaging and labeling requirements.

OUR MANUFACTURING FACILITY AND WAREHOUSE

OUR FACTORY

OUR WAREHOUSE

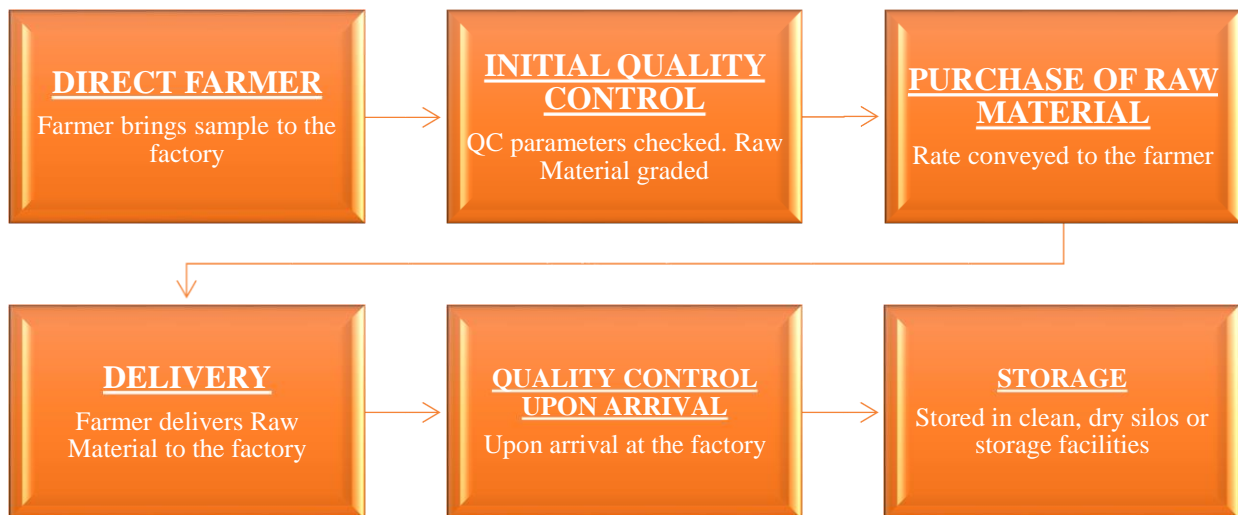

RAW MATERIAL

Our Company thrives on the versatility of Wheat as our primary raw material. Advanced processing techniques transform Wheat into a diverse product line, featuring Chakki Fresh Atta, Whole Wheat Flour, Wheat Flour, Sortex Wheat, Rawa, Suji, Maida, and Daliya. Our precision-driven manufacturing ensures top-notch quality, with strict adherence to safety standards. With a robust supply chain, sustainable sourcing, and innovation, we maintain a competitive edge, meeting evolving market needs.

RAW MATERIAL FLOW CHART

The process of sourcing and handling raw wheat material for a wheat processing factory involves several critical stages, ensuring the quality and consistency of the final product. The following steps outline the typical flow:

1. **Direct Farmer Engagement:** Farmers bring a sample of their wheat to the factory. This direct engagement allows the factory to establish relationships with the farmers and ensure a reliable source of raw material. Direct procurement from farmers helps in maintaining the quality and traceability of the wheat.
2. **Initial Quality Control (QC) of Sample:** Upon arrival, the sample undergoes a thorough quality control check. This initial QC step involves assessing the wheat's moisture content, grain size, color, and overall quality. The

sample is tested for contaminants, foreign materials, and other quality parameters to ensure it meets the factory's standards. Only samples that pass this quality check proceed to the next step.

3. **Purchase of Raw Material:** Once the sample passes the quality control tests, the factory negotiates the purchase of the wheat from the farmer. The agreed-upon quantity and price are documented, and a purchase agreement is finalized. This step includes arranging for the logistics and transport of the raw material from the farm to the factory.
4. **Delivery of Raw Material:** The purchased wheat is delivered to the factory. During transport, measures are taken to protect the wheat from moisture, pests, and other potential contaminants. Proper handling during delivery ensures that the wheat maintains its quality and integrity.
5. **Quality Control Upon Arrival:** Upon arrival at the factory, the delivered wheat undergoes a second, more comprehensive quality control inspection. This QC step is crucial to verify that the bulk shipment matches the quality of the initial sample. The wheat is tested for various parameters, including moisture content, purity, and the presence of any contaminants or foreign materials.
6. **Storage:** After passing the final quality control checks, the wheat is stored in clean, dry silos or storage facilities. Proper storage conditions are maintained to protect the wheat from moisture, pests, and other factors that could compromise its quality. The storage environment is monitored to ensure the wheat remains in optimal condition until it is processed.

By adhering to this structured flow of raw material from direct farmer engagement to final quality control, the wheat processing factory ensures that only the highest quality wheat is used in production. This meticulous process helps maintain the integrity of the products, enhances customer satisfaction, and supports sustainable relationships with farmers.

CLEANING – PROCESS FLOW CHART

In our wheat processing factory, the cleaning process is fully automated, ensuring high efficiency and precision with no human intervention. This comprehensive cleaning process includes the following steps:

1. **Sieving:** The initial step involves sieving, where the wheat is passed through a series of sieves of varying mesh sizes. This process effectively separates large impurities like stones, sticks, and straw from the wheat grains. Sieving ensures that only the appropriate-sized grains move forward in the cleaning process.
2. **Threshing:** Threshing is the next step, where any remaining husks and chaff are separated from the wheat grains. This step is crucial for ensuring that the wheat is free from external coverings and can be processed efficiently.
3. **Destoning:** Following threshing, the wheat undergoes destoning. This process uses density-based separation techniques to remove stones and other heavy impurities that may be similar in size to the wheat grains. Destoning ensures that only the wheat grains are processed further, protecting the milling equipment from potential damage.
4. **Magnetic Separation:** In the magnetic separation stage, magnetic separators are used to remove any metallic contaminants that may be present in the wheat. This step is vital for ensuring the safety and quality of the final product, as metallic contaminants can pose health risks and damage processing equipment.
5. **Dampening:** The dampening process involves adding a controlled amount of water to the wheat grains. This step helps to achieve the desired moisture content, which is essential for the milling process. Dampening also softens the wheat, making it easier to separate the bran and germ from the endosperm during milling.
6. **Brushing:** After dampening, the wheat grains undergo brushing. In this step, brushes are used to clean the surface of the grains, removing any remaining dirt, dust, and loose bran particles. Brushing enhances the cleanliness of the grains, ensuring a higher quality end product.
7. **Air Draft Cleaning:** The final cleaning step is air draft cleaning, where powerful air currents are used to blow away light impurities such as dust, chaff, and small bits of straw. This process ensures that the wheat grains are thoroughly cleaned and free from any lightweight contaminants.

Throughout the entire cleaning process, our company employs state-of-the-art automation technology. Advanced sensors and control systems monitor each stage, ensuring optimal performance and consistency. The fully automated nature of our cleaning process eliminates the need for human intervention, reducing the risk of contamination and ensuring the highest standards of hygiene and efficiency.

By leveraging automation, our factory maintains a consistent and high-quality cleaning process, setting the foundation for producing superior wheat products. This meticulous and automated approach guarantees that only the cleanest and purest wheat grains are used in our production, contributing to the excellence of our final products.

However, due to uncertainties attached to the assumptions and estimates made actual results could differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

Annexure 4: Statement of Notes to the Restated Financial Information

f. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g. DEPRECIATION AND AMORTISATION

Depreciation on property, plant and equipment is provided on Straight Line basis using the rates arrived at based on the useful lives specified in the Schedule II to the Companies Act, 2013. The Company has used the following useful life to provide depreciation on its property, plant and equipment.

Depreciation and amortisation on assets acquired / disposed of during the year is provided on pro-rata basis with reference to the date of acquisition / disposal.

h. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Annexure 4: Statement of Notes to the Restated Financial Information

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity. Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

Annexure 4: Statement of Notes to the Restated Financial Information

k. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

l. EARNINGS PER SHARE:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m. TAXATION:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

Annexure 4: Statement of Notes to the Restated Financial Information

n. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS:

(i) Provisions

A provision is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(ii) Contingent Assets

Contingent Assets are neither recognised nor disclosed in the financial statements.

o. SEGMENT REPORTING

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure.

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship to the operating activities of the segment.

Inter-segment revenue is accounted on the basis of transactions which are primarily determined based on market / fair value factors.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under "unallocated revenue / expenses / assets / liabilities".

q. LEASES

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases'. Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Our Company is having state of the art modern machinery in our wheat processing plant in Indore, India, with an installed capacity of 170 Tons/Day as of June 30, 2024.

Wheat processing into flour involves several key steps. First, harvested wheat grains are cleaned to remove impurities such as stones, chaff, and other foreign materials. The cleaned wheat is then tempered with water to achieve the desired moisture content, making it easier to separate the bran and germ from the endosperm. Next, the wheat is milled through a series of rollers that progressively break down the grain into finer particles. The endosperm is ground into flour, while the bran and germ are sifted out and collected as by-products. The resulting flour is then subjected to quality control checks to ensure it meets specified standards before packaging and distribution. The by-products of this process, primarily bran, are not wasted. Bran, rich in fiber, is often sold as a nutritional supplement for human consumption or as animal feed. The by-products are

valuable commodities, generating additional revenue streams and contributing to waste minimization in the wheat processing industry.

Our company's main aim is to grow relationships with our customers that we can serve successfully by providing them a point of difference, adding value and ultimately, providing profitable growth for both parties. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment

instructions of the Retail Individual Applicants into the UPI Mechanism.

The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “*Issue Procedure*” beginning on page 221 of this Draft Red Herring Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 221 of this Draft Red Herring Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue

Period.
